

## NOCTURNAL PULSOXYMETRY – INSTRUCTIONS

- 1 Attach the device on your left wrist before going to bed.
- 2 Slide the ring sensor onto your thumb as shown below.

- 3 Press the on/off button on the side 1x to switch on the device.
- 4 After a short vibration check, time and battery charge levels are displayed.
- 5 Subsequently, the screen displays **MODE**  followed by **SLEEP MODE**
- 6 Now the measurement starts automatically.
- 7 You can see your current oxygen saturation (SPO2 %) and pulse on the screen.

- 8 The ring sensor on your thumb glows reddish during the measurement.
- 9 Wear the device throughout the whole night.
- 10 Stop the recording in the morning before getting up by pressing the on/off button for 3 seconds.
- 11 Remove the device including the ring sensor and put it back into the box.
- 12 Return the box to your physician.
